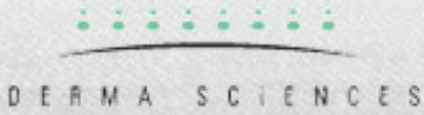
Total Contact Casting - Efficacy and Application



TCC Educational Program, 2 Free CMEs

Derma Sciences, in conjunction with WebCME, is pleased to offer an ducational program on Off-loading and Total Contact Casting (TCC).

Total Contact Casting (TCC) is recognized as the Gold Standard for offloading in the management of the patient with a Diabetic Foot Ulcer (DFU). This presentation briefly reviews the epidemiology and clinical management of DFUs, and reviews the complications related to this condition including infection and amputation, but focuses primarily on the techniques and skills required for correct application of a TCC. Detailed instruction is provided for the application of both the traditional cast and well as the newer TCC-EZ® System. The student will learn proper application and cast removal sequences as well as clinical pearls that will ensure optimal patient outcomes.

At the conclusion of this educational activity, participants should be able to:

- Understand the importance of off-loading the diabetic foot.
- Know the evidence that supports the use of TCC in patients with DFUs.
- Explain the mechanism and physiology for decreasing plantar pressures with TCC.
- Learn the application and removal techniques for traditional and market leading TCC-EZ.

2 hour, 2 CME credit program
Presented by Dr. Jeffrey Niezgoda

Free Course Login instructions ($49.99 value):

1. Go to the the webCME website and the TCC program webcme.net/courses/WND107
2. Add Total Contact Casting program (WND107) to your cart
3. From the My Cart screen, fill out the e-mail address and phone number
4. Click on 'Have a coupon or referral code?' link on the bottom of the form and enter "dermasciences" in the box. (no spaces or capitals)
5. The course should now be free. If purchasing other courses as well, fill out payment information.
6. Click Checkout. You now have the TCC course and you are part of the Derma Sciences group.
