References:
TCC INDICATIONS

**Diabetic Foot Ulcers**
Located on the plantar, mid-foot or heel

**Post-Operative Care**
Including but not limited to Charcot reconstruction, delayed primary closure, post TAL Charcot neuroarthropathy

Acute or sub-acute
(Recommended in ADA Guidelines)*

TCC is indicated for non infected wounds with adequate blood supply

* 2011 ADA and APMA Charcot Consensus statement: “Off-loading at the acute active stage of the Charcot foot is the most important management strategy, and only after the progression of deformity becomes the foot should be immobilized in a removable total contact cast (TCC).”

### TCC INDICATIONS

### Diabetic Foot Ulcers
Located on the plantar, mid-foot or heel

### Post-Operative Care
Including but not limited to Charcot reconstruction, delayed primary closure, post TAL Charcot neuroarthropathy

Acute or sub-acute
(Recommended in ADA Guidelines)*

**TCC**

**MedE-Kast**
TOTAL CONTACT CAST

**MedE-Kast Ultra**
TOTAL CONTACT CAST

Derma Sciences is the only company to give you the flexibility of the quick and easy TCC-EZ® casting system and a traditional Total Contact Cast as well.

The traditional MedE-Kast® and MedE-Kast® Ultra Total Contact Cast Systems provide a healthcare provider with the necessary components to apply a total contact cast in one simple kit. The MedE-Kast® Ultra Total Contact Cast System contains two pre-made spints to help make the application process easier and faster
