TCC-EZ® and Evenup®
Enables easier ambulation for some casted patients

The #1 recommended and used Total Contact Cast System (TCC).

The Gold Standard and preferred method for taking weight off diabetic foot wounds 1-7, so the wounds can heal and the patient can live their life.

Numerous studies show that TCCs heals 90% of foot wounds in about 5-8 weeks, helping to avoid complications that could lead to amputations. 1-7

Supports patients by allowing them to walk more balanced and function comfortably.

Adjustable straps for any enclosed flat soled shoe and interchangeable for the right or left foot.

Clinical Recommendations:
- To be used on opposite foot from TCC-EZ®. It is not a replacement for TCC-EZ® boot.
- Reducing ambulation helps off-load, enabling wounds to heal faster. Evenup® should not be used to enable patients to walk more.
- Evenup® can be considered on TCC-EZ® patients who have hip or back issues to enable them to get the preferred method in off-loading.
- While wearing TCC-EZ®, with or without Evenup®, a 4 prong cane or walker might be recommended/needed.
- Recommended for use with laced oxfords, orthopedic shoes or sneakers (cannot be used with sandals).
- Evenup® should be worn securely fastened to a shoe.
